

Pro Measuring Wheel

Komelon's Metal Measuring Wheel has a rugged steel frame that will withstand the harshest of environments. The mechanical counter with LED light ensures precise and accurate measurements while allowing the ability to use the wheel at nighttime. There is a convenient metal kickstand that is easily accessible at any point in time. Compact storage is available with the telescoping handle. The smooth operation of this wheel is due to the ball bearings that work hard to reduce any friction. Lastly, the high visibility frame increases safety and awareness. If you're looking for a durable wheel that can withstand harsh everyday use, this is your wheel!
